

## Product information:

---

The TR3xxx offers a range of line transformers with a power ranging from 30 Watt up to 480 Watt. There are different taps available for 50V, 70V and 100V lines and the low impedance side is selectable between 2 Ohm, 4 Ohm and 8 Ohm.

## System specifications:

---

|                        |              |
|------------------------|--------------|
| Peak power handling    | 480 W        |
| Program power handling | 240 W        |
| Connectors             | 7.87 " cable |

## Product Features:

---

|              |                                  |
|--------------|----------------------------------|
| Dimensions   | 5.12 x 2.56 x 5.12 " (W x H x D) |
| Weight       | 9.92 lb                          |
| Construction | Copper                           |
